Mounting & Wiring

Installation Instructions

120 VAC · up/down switch

A) MOUNTING METHODS**MOUNTING**

Mount the cylinder to an outlet box rated for the fixture weight (2.7 lb), keeping the lenses clear at both ends; the specification sheet publishes no mounting pattern, so confirm the mounting detail with Sage before rough-in.

LIGHT DISTRIBUTION

Set the internal switch for down light only or for up and down light before closing the housing.

B) WIRING & SYSTEM TEST

1. Turn off the branch circuit before installation. All wiring per NEC and local code.
2. Connect the 120 VAC supply to the luminaire leads.
3. Energize and verify output in the selected distribution.
4. Inspection: check the lenses and the mounting as local practice requires.
